Siyanet Getahun

Software Engineer | Frontend Heavy Full Stack Developer

siyangetahunw@gmail.com · +251931699569 · Addis Ababa, Ethiopia · https://www.linkedin.com/in/siyanet-getahun-5b7734287/ · https://siyanet.netlify.app/

SUMMARY

Results driven Full-Stack Software Engineer with experience building scalable, user-centric web applications. Proven ability to deliver high quality solutions from concept to deployment, leveraging expertise in React, TypeScript, and Django to enhance performance and user experience. Experienced in asynchronous communication, proficient with remote collaboration tools, and self motivated for remote environments.

EXPERIENCE

Full-Stack Software Engineer — present

Swenetix (formerly Addis Software) · onSite

Contributing to the development of scalable software solutions across multiple products on an electric mobility platform. Working on both frontend and backend systems to deliver reliable, user-focused applications. Collaborating with cross functional teams to design, build, and maintain core product features. Integrating APIs and services to support real-time system interactions and data flow. Enhancing code quality, performance, and maintainability through refactoring and best practices. Participating in code reviews and continuous improvement of development processes. Experienced in asynchronous communication and proficient with remote collaboration tools (e.g., Slack, Zoom).

Full-Stack Software Engineer

Seamless Technology · Remote/Hybrid

Worked on large-scale health and data platforms used by public-sector stakeholders. Refactored frontend and backend modules in OpenIMIS, improving maintainability and reducing technical debt by 20%. Collaborated with backend teams to align API contracts with frontend data needs. Contributed to UI consistency, data presentation, and validation workflows in the NHDD platform. Participated in code reviews and iterative improvements following engineering best practices. Experienced in asynchronous communication and proficient with remote collaboration tools (e.g., Slack, Zoom).

Frontend Developer and UI/UX Designer

Kuraz Tech · Remote/Hybrid

Contributed to a complete Restaurant Management System using React, Redux, and Tailwind CSS. Built reusable components and responsive UIs, improving maintainability and load speed by 15%. Awarded Best UI/UX Design and nominated Best Frontend Developer.

EDUCATION

B.Sc, Software Engineering

Bahirdar University · GPA 3.51

SKILLS

React.js · Redux · TypeScript · NextJs · Tailwind CSS · Styled Components · Component-driven architecture · Django · Django REST Framework · PostgreSQL · API development · Authentication (JWT, Djoser) · Git · GitHub · Postman · Docker · Figma · Trello · Linux · Jira · Problem-solving · teamwork · remote collaboration · time management · attention to detail · asynchronous communication · remote collaboration tools (Slack, Zoom) · self-motivated and disciplined for remote environments · nodejs · mongoDB

PROJECTS

Dodai E-Mobility Platform

Worked on scalable frontend systems, operational dashboards, mobile application workflows, API integrations, and multi-role platform experiences. Contributed to feature development, frontend architecture, state management, and responsive production-level interfaces supporting real-time operational workflows

National Health Data Dictionary (NHDD)

Worked as the Backend Developer responsible for designing backend architecture, developing scalable REST APIs, implementing business workflows, and optimizing system performance based on data access and creation patterns. Contributed to building reliable and maintainable workflow-driven healthcare data operations for large-scale national usage

Community-Based Health Insurance (CBHI)

Worked on frontend and backend development, feature customization, workflow improvements, and scalable system enhancements for healthcare insurance operations. Contributed to modernizing workflows, improving maintainability, and developing production-ready operational features

AddisBooking web app
The system enables service providers to create profiles, list services, manage availability calendars, and receive bookings from customers. It streamlines appointment scheduling, payments, and notifications, offering a seamless experience for both providers and clients.

AWARDS

Best UI/UX Design
Kuraz Tech

Best Frontend Developer
Kuraz Tech
Nominated

Meta Back-End Develope
Coursera
Completed the Meta Back-End Developer Professional Certificate on Coursera, developing practical skills in Python, Django, APIs, databases, Git, and back-end web development. Built and worked with REST APIs, relational databases, and server-side applications while applying software development and version control best practices.
